

# **Test Objective**

The objective of this test was to validate the signup workflow of the application <https://authorized-partner.vercel.app/> using automation. The focus was to verify navigation behavior, form validation, and submission handling.

## **Test Environment**

- OS: Windows 10
- Language: Python 3.12
- Framework: Playwright
- Browser: Chromium

## **Test Scenario**

The automation script performs the following steps:

Opens <https://authorized-partner.vercel.app/>

Navigates to Login

Opens Sign Up flow

Accepts agreement checkbox

Fills personal details form

Attempts to proceed using Next button

Then submit.

## **Test Data**

Field	Value
First Name	Diwas
Last Name	Kushwaha
Email	<a href="mailto:diwas@example.com">diwas@example.com</a>
Phone	982964746
Password	TestPassword123

## Expected Result

After entering valid data and clicking Next, the application should navigate to the next step of registration until submit.

## Actual Result

The Next button click is registered, but navigation does not occur. The application remains on the same page.

## Conclusion

The signup flow contains a potential usability issue where form submission fails silently. This behavior could confuse users and should be investigated.
